Change in Reel Material for Bourns® Model MF-MSMF Series

Description of Change:

The reel color of the Bourns® Model MF-MSMF Series will be changed from transparent to white. The material of the reel will not change, only the color. The color is changed from transparent to white solely to facilitate the use of Bourns' high-speed packing machine. The optical sensors of the high-speed packing machine have difficulty processing a transparent reel.

Additional Information:

- The dimensions of the tape and reel are not affected by this PCN.
- The quantities of the tape and reel are not affected by this PCN.

Please contact your local Bourns representative with any questions or refer to www.bourns.com.
