LM3480 100-mA, SOT-23, Quasi Low-Dropout Linear Voltage Regulator

1 Features

- Input Voltage Range: up to 30 V
- 3.3-V, 5-V, 12-V, and 15-V Versions Available
- Packaged in the Tiny 3-Lead SOT-23 Package
- 30-V Maximum Input for Operation
- 1.2-V Ensured Maximum Dropout Over Full Load and Temperature Ranges
- 100-mA Ensured Minimum Load Current
- ±5% Ensured Output Voltage Tolerance Over Full Load and Temperature Ranges
- −40 to +125°C Junction Temperature Range for Operation

2 Applications

- Tiny Alternative to LM78Lxx Series and Similar Devices
- Tiny 5-V ±5% to 3.3-V, 100-mA Converter
- Post Regulator for Switching DC/DC Converter
- Bias Supply for Analog Circuits

3 Description

The LM3480 is an integrated linear voltage regulator. It features operation from an input as high as 30 V and an ensured maximum dropout of 1.2 V at the full 100-mA load. Standard packaging for the LM3480 is the 3-lead SOT-23 package.

The 5-V, 12-V, and 15-V members of the LM3480 series are intended as tiny alternatives to industry standard LM78Lxx series and similar devices. The 1.2-V quasi-low dropout of LM3480 series devices makes them a nice fit in many applications where the 2-V to 2.5-V dropout of LM78Lxx series devices precludes their (LM78Lxx series devices) use.

The LM3480 series also features a 3.3-V member. The SOT-23 packaging and quasi-low dropout features of the LM3480 series converge in this device to provide a very nice, very tiny, 3.3-V, 100-mA bias supply that regulates directly off the system 5-V ±5% power supply.

Device Information[1]

PART NUMBER	PACKAGE	BODY SIZE (NOM)
LM3480	SOT-23 (3)	2.92 mm × 1.30 mm

6 Specifications

6.1 Absolute Maximum Ratings(1)(2)

	MIN	MAX	UNIT
Input voltage (IN to GND)	–0.3	35	V
Power dissipation(3)		Internally Limited	
Junction temperature(3)	–40	150	°C
Storage temperature, T_{stg}	−65	150	°C

(1) *Absolute Maximum Ratings* are limits beyond which damage to the device may occur. *Recommended Operating Conditions* are conditions under which operation of the device is ensured. Recommended operating ratings do not imply ensured performance limits. For ensured performance limits and associated test conditions, see the *Electrical Characteristics: LM3480-3.3, LM3480-5*.
(2) If Military- or Aerospace-specified devices are required, please contact the TI Sales Office/Distributors for availability and specifications.
(3) The Absolute Maximum power dissipation depends on the ambient temperature and can be calculated using $P = (T_J – T_A) / R_{\theta JA}$ where T_J is the junction temperature, T_A is the ambient temperature, and $R_{\theta JA}$ is the junction-to-ambient thermal resistance. The 370-mW rating results from substituting the Absolute Maximum junction temperature, 150°C for T_J, 50°C for T_A, and 269.6°C/W for $R_{\theta JA}$. More power can be safely dissipated at lower ambient temperatures. Less power can be safely dissipated at higher ambient temperatures. The Absolute Maximum power dissipation can be increased by 3.7 mW for each °C below 50°C ambient. It must be derated by 3.7 mW for each °C above 50°C ambient. Heat sinking enables the safe dissipation of more power. The LM3480 actively limits its junction temperature to about 150°C.

6.2 ESD Ratings

			VALUE	UNIT
$V_{(ESD)}$	Electrostatic discharge	Human-body model (HBM), per ANSI/ESDA/JEDEC JS-001(1)	±2000	V
		Charged-device model (CDM), per JEDEC specification JESD22-C101(2)	±500	

(1) JEDEC document JEP155 states that 500-V HBM allows safe manufacturing with a standard ESD control process.
(2) JEDEC document JEP157 states that 250-V CDM allows safe manufacturing with a standard ESD control process.

6.3 Recommended Operating Conditions

over operating free-air temperature range (unless otherwise noted)(1)

	MIN	MAX	UNIT
Maximum input voltage (IN to GND)	0	30	V
Junction temperature (T_J)	–40	125	°C

(1) *Absolute Maximum Ratings* are limits beyond which damage to the device may occur. *Recommended Operating Conditions* are conditions under which operation of the device is ensured. Recommended operating ratings do not imply ensured performance limits. For ensured performance limits and associated test conditions, see the *Electrical Characteristics: LM3480-3.3, LM3480-5*.

6.4 Thermal Information

THERMAL METRIC(1)		LM3480 SOT-23 (DBZ) 3 PINS	UNIT
$R_{\theta JA}$	Junction-to-ambient thermal resistance	269.6	°C/W
$R_{\theta JC(top)}$	Junction-to-case (top) thermal resistance	141.1	
$R_{\theta JB}$	Junction-to-board thermal resistance	63.1	
ψ_{JT}	Junction-to-top characterization parameter	24.2	
ψ_{JB}	Junction-to-board characterization parameter	62.1	

(1) For more information about traditional and new thermal metrics, see the *IC Package Thermal Metrics* application report, SPRA953.

6.5 Electrical Characteristics: LM3480-3.3, LM3480-5

Typical and other limits apply for $T_A = T_J = 25°C$, unless otherwise specified. Nominal output voltage (V_{NOM}) = 3.3 V or 5 V.[1][2][3]

PARAMETER		TEST CONDITIONS	V_{NOM} = 3.3 V			V_{NOM} = 5 V			UNIT
			MIN	TYP	MAX	MIN	TYP	MAX	
V_{OUT}	Output voltage	$V_{IN} = V_{NOM} + 1.5$ V 1 mA ≤ I_{OUT} ≤ 100 mA	3.17	3.3	3.43	4.8	5	5.2	V
		$V_{IN} = V_{NOM} + 1.5$ V 1 mA ≤ I_{OUT} ≤ 100 mA −40°C ≤ T_J ≤ 125°C	3.14		3.46	4.75		5.25	
ΔV_{OUT}	Line regulation	$V_{NOM} + 1.5$ V ≤ V_{IN} ≤ 30 V I_{OUT} = 1 mA		10			12		mV
		$V_{NOM} + 1.5$ V ≤ V_{IN} ≤ 30 V I_{OUT} = 1 mA −40°C ≤ T_J ≤ 125°C			25			25	
ΔV_{OUT}	Load regulation	$V_{IN} = V_{NOM} + 1.5$ V 10 mA ≤ I_{OUT} ≤ 100 mA		20			20		mV
		$V_{IN} = V_{NOM} + 1.5$ V 10 mA ≤ I_{OUT} ≤ 100 m −40°C ≤ T_J ≤ 125°C			40			40	
I_{GND}	Ground pin current	$V_{NOM} + 1.5$ V ≤ V_{IN} ≤ 30 V No Load		2			2		mA
		$V_{NOM} + 1.5$ V ≤ V_{IN} ≤ 30 V No Load, −40°C ≤ T_J ≤ 125°C			4			4	
V_{IN} - V_{OUT}	Dropoutvoltage	I_{OUT} = 10 mA		0.7	0.9		0.7	0.9	V
		I_{OUT} = 10 mA −40°C ≤ T_J ≤ 125°C			1			1	
		I_{OUT} = 100 mA		0.9	1.1		0.9	1.1	V
		I_{OUT} = 100 mA −40°C ≤ T_J ≤ 125°C			1.2			1.2	
e_n	Output noise voltage	V_{IN} = 10 V Bandwidth: 10 Hz to 100 kHz		100			150		μV_{rms}

(1) A typical is the center of characterization data taken with $T_A = T_J = 25°C$. Typicals are not ensured.
(2) All limits are ensured. All electrical characteristics having room-temperature limits are tested during production with $T_A = T_J = 25°C$. All hot and cold limits are ensured by correlating the electrical characteristics to process and temperature variations and applying statistical process control.
(3) All voltages except dropout are with respect to the voltage at the GND pin.

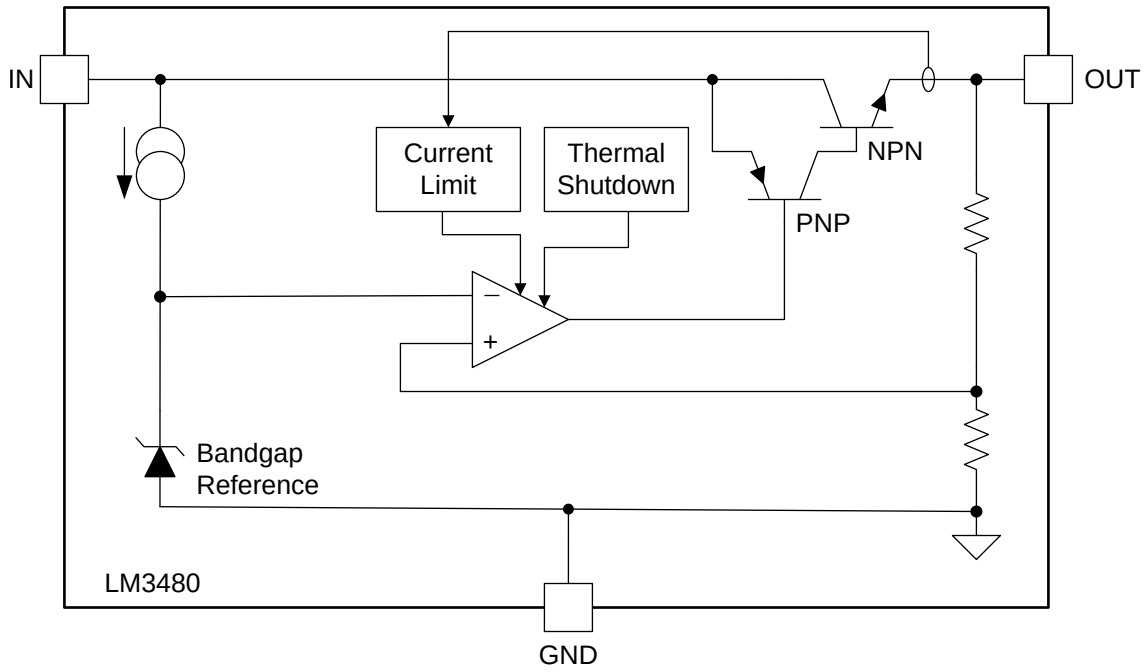
7 Detailed Description

7.1 Overview

The LM3480 is an integrated linear voltage regulator with inputs that can be as high as 30 V. It ensures a maximum dropout of 1.2 V at the full load of 100 mA. The LM3480 has different output options including 3.3-V, 5-V, 12-V, and 15-V outputs, making LM3480 the tiny alternative to industry standard LM78Lxx series and similar devices.

7.2 Functional Block Diagram



7.3 Feature Description

7.3.1 3.3-V, 5-V, 12-V, and 15-V Versions Available

The 3.3-V, 5-V, 12-V, and 15-V versions of LM3480 series are intended as tiny alternatives to industry standard LM78Lxx series and similar devices.

7.3.2 1.2-V Ensured Maximum Dropout

The 1.2-V quasi-low dropout of the LM3480 series devices make them a nice fit in many application where the 2-V to 2.5-V dropout of LM78Lxx series devices precludes their use.

7.4 Device Functional Modes

7.4.1 Operation with V_{IN} = 5 V

The 3.3-V member of LM3480 can operate with an input of 5 V ±5%, its tiny SOT-23 package and quasi-low dropout makes it suitable for providing a very tiny, 3.3-V, 100-mA bias supply from 5-V power supply.

8 Application and Implementation

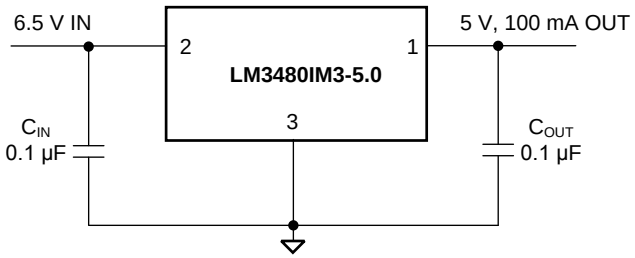
NOTE

Information in the following applications sections is not part of the TI component specification, and TI does not warrant its accuracy or completeness. TI's customers are responsible for determining suitability of components for their purposes. Customers should validate and test their design implementation to confirm system functionality.

8.1 Application Information

The LM3480 is a linear voltage regulator with 1.2-V ensured maximum dropout and 100-mA ensured minimum load current. This device has 3.3-V, 5-V, 12-V, and 15-V versions. The implementation of LM3480 is discussed in this section.

8.2 Typical Application



8.2.1 Design Requirements

DESIGN PARAMETER	EXAMPLE VALUE
Input voltage	6.5 V
Output voltage	5 V
Output current	100 mA

8.2.2 Detailed Design Procedure

8.2.2.1 External Capacitors

A minimum input and output capacitance value of 0.1 µF is required for stability and adequate transient performance. There is no specific ESR limitation, although excessively high ESR will compromise transient performance. There is no specific limitation on a maximum capacitance value on the input or the output.

8.2.2.1.1 Output Capacitor

The minimum output capacitance required to maintain stability is 0.1 µF. Larger values of output capacitance can be used to improve transient behavior.

8.2.3 Application Curves

Unless indicated otherwise, V_{IN} = 6.5 V, V_{OUT} = 5 V, C_{OUT} = 0.1 µF, and T_A = 25°C

9 Power Supply Recommendations

The LM3480 is designed to operated from up to a 30-V input voltage supply. This input supply must be well regulated. If the input supply is noisy, additional input capacitors with low ESR can help to improve the output noise performance.

10 Layout

10.1 Layout Guidelines

For best overall performance, place all the circuit components on the same side of the circuit board and as near as practical to the respective LDO pin connections. Place ground return connections to the input and output capacitors, and to the LDO ground pin as close to each other as possible, connected by a wide, component-side, copper surface. The use of vias and long traces to create LDO circuit connections is strongly discouraged and negatively affects system performance. This grounding and layout scheme minimizes the inductive parasitic, and thereby reduces load-current transients, minimizes noise, and increases circuit stability.

A ground reference plane is also recommended and is either embedded in the PCB itself or located on the bottom side of the PCB opposite the components. This reference plane serves to assure accuracy of the output voltage, shield noise, and behaves similar to a thermal plane to spread heat from the LDO device. In most applications, this ground plane is necessary to meet thermal requirements.

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".
RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.
Green: TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

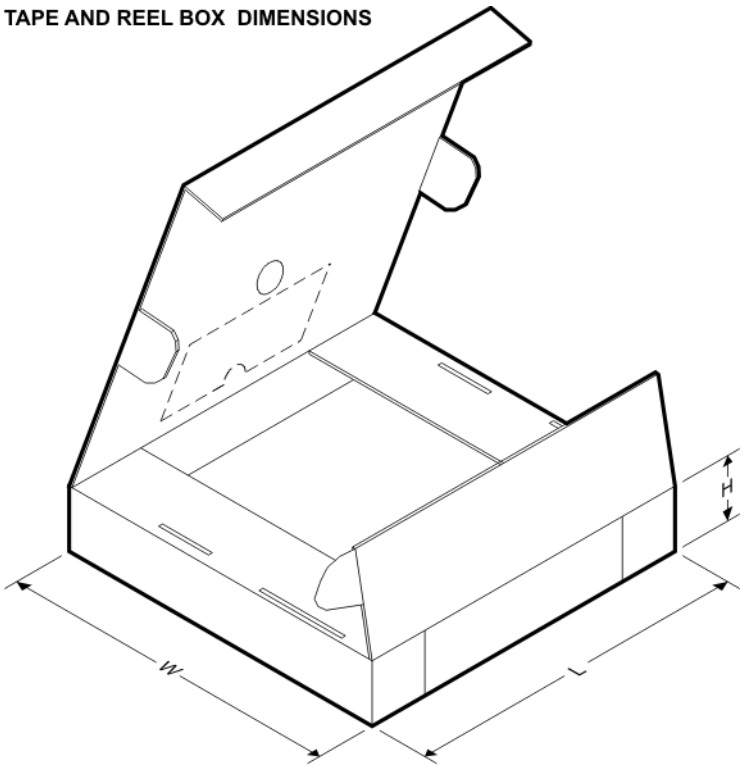
TAPE AND REEL BOX DIMENSIONS



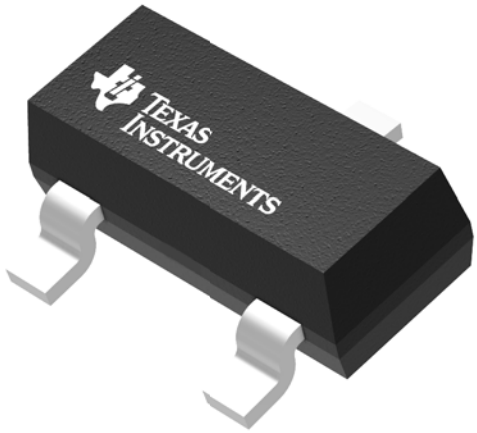
*All dimensions are nominal

Device	Package Type	Package Drawing	Pins	SPQ	Length (mm)	Width (mm)	Height (mm)
LM3480IM3-12	SOT-23	DBZ	3	1000	208.0	191.0	35.0
LM3480IM3-12/NOPB	SOT-23	DBZ	3	1000	208.0	191.0	35.0
LM3480IM3-15/NOPB	SOT-23	DBZ	3	1000	208.0	191.0	35.0
LM3480IM3-3.3	SOT-23	DBZ	3	1000	208.0	191.0	35.0
LM3480IM3-3.3/NOPB	SOT-23	DBZ	3	1000	208.0	191.0	35.0
LM3480IM3-5.0	SOT-23	DBZ	3	1000	208.0	191.0	35.0
LM3480IM3-5.0/NOPB	SOT-23	DBZ	3	1000	208.0	191.0	35.0
LM3480IM3X-12/NOPB	SOT-23	DBZ	3	3000	208.0	191.0	35.0
LM3480IM3X-15/NOPB	SOT-23	DBZ	3	3000	208.0	191.0	35.0
LM3480IM3X-3.3	SOT-23	DBZ	3	3000	208.0	191.0	35.0
LM3480IM3X-3.3/NOPB	SOT-23	DBZ	3	3000	208.0	191.0	35.0
LM3480IM3X-5.0/NOPB	SOT-23	DBZ	3	3000	208.0	191.0	35.0

GENERIC PACKAGE VIEW

DBZ 3 SOT-23 - 1.12 mm max height

SMALL OUTLINE TRANSISTOR



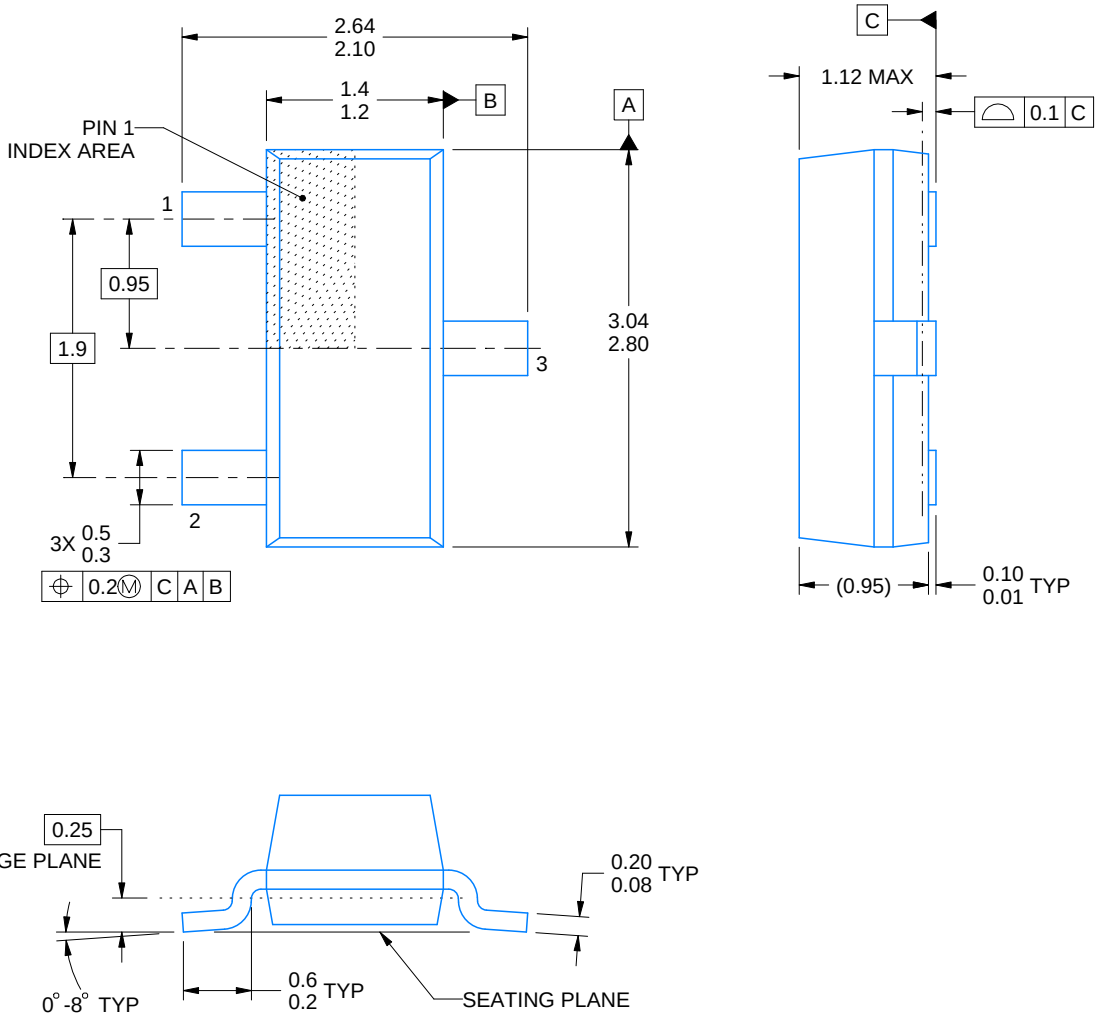
Images above are just a representation of the package family, actual package may vary.
Refer to the product data sheet for package details.

PACKAGE OUTLINE

DBZ0003A

SOT-23 - 1.12 mm max height

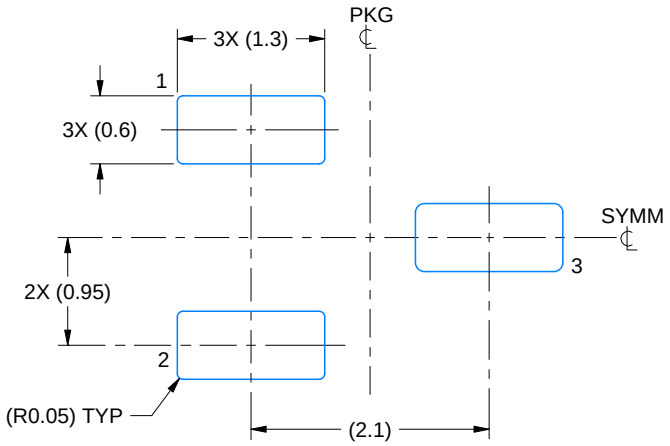
SMALL OUTLINE TRANSISTOR



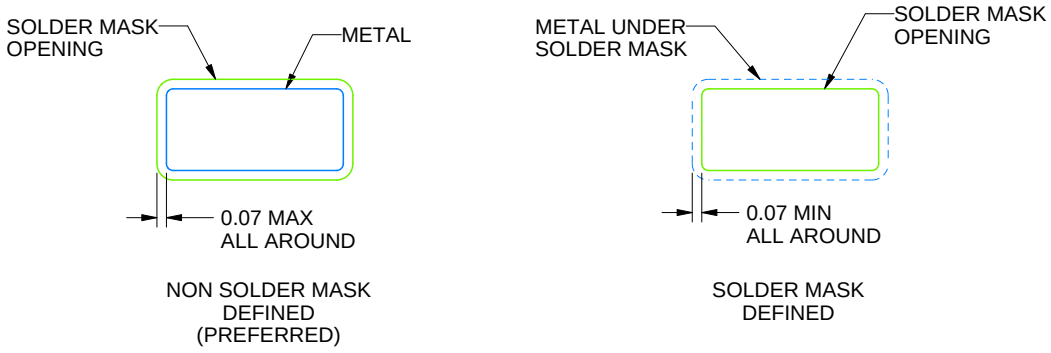
4214838/C 04/2017

NOTES:

1. All linear dimensions are in millimeters. Any dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M.
2. This drawing is subject to change without notice.
3. Reference JEDEC registration TO-236, except minimum foot length.



LAND PATTERN EXAMPLE
SCALE:15X

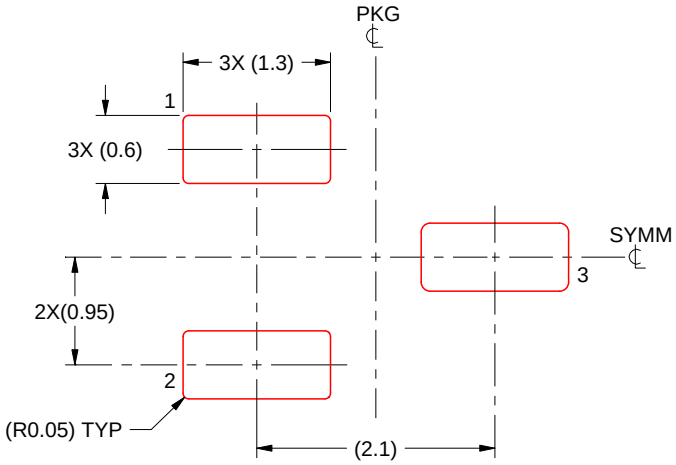


SOLDER MASK DETAILS

4214838/C 04/2017

NOTES: (continued)

4. Publication IPC-7351 may have alternate designs.
5. Solder mask tolerances between and around signal pads can vary based on board fabrication site.



SOLDER PASTE EXAMPLE
BASED ON 0.125 THICK STENCIL
SCALE:15X

4214838/C 04/2017

NOTES: (continued)

6. Laser cutting apertures with trapezoidal walls and rounded corners may offer better paste release. IPC-7525 may have alternate design recommendations.
7. Board assembly site may have different recommendations for stencil design.

IMPORTANT NOTICE AND DISCLAIMER

TI PROVIDES TECHNICAL AND RELIABILITY DATA (INCLUDING DATA SHEETS), DESIGN RESOURCES (INCLUDING REFERENCE DESIGNS), APPLICATION OR OTHER DESIGN ADVICE, WEB TOOLS, SAFETY INFORMATION, AND OTHER RESOURCES “AS IS” AND WITH ALL FAULTS, AND DISCLAIMS ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

These resources are intended for skilled developers designing with TI products. You are solely responsible for (1) selecting the appropriate TI products for your application, (2) designing, validating and testing your application, and (3) ensuring your application meets applicable standards, and any other safety, security, regulatory or other requirements.

These resources are subject to change without notice. TI grants you permission to use these resources only for development of an application that uses the TI products described in the resource. Other reproduction and display of these resources is prohibited. No license is granted to any other TI intellectual property right or to any third party intellectual property right. TI disclaims responsibility for, and you will fully indemnify TI and its representatives against, any claims, damages, costs, losses, and liabilities arising out of your use of these resources.

TI’s products are provided subject to TI’s Terms of Sale or other applicable terms available either on ti.com or provided in conjunction with such TI products. TI’s provision of these resources does not expand or otherwise alter TI’s applicable warranties or warranty disclaimers for TI products.

TI objects to and rejects any additional or different terms you may have proposed.
