

Product/Process Change Notice - PCN 20_0126 Rev. D

Analog Devices, Inc. One Analog Way, Wilmington, MA 01887

This notice is to inform you of a change that will be made to certain ADI products (see Appendix A) that you may have purchased in the last 2 years. **Any inquiries or requests with this PCN (additional data or samples) must be sent to ADI within 30 days of publication date.** ADI contact information is listed below.

Note: Revised fields are indicated by a red field name. See Appendix B for revision history.

PCN Title: Conversion of Select Sizes LFCSP Products from Punched to Sawn and Transfer of Assembly Site to ASE Korea

Publication Date: 09-Jun-2021

Effectivity Date: 08-May-2021 *(the earliest date that a customer could expect to receive changed material)*

Revision Description:

Add 9x9 AD5391 Qualification Results Summary.

Description Of Change:

1. Assembly site transfer from STATS ChipPAC Singapore (STA) to ASE, Korea (AEK): ADI is utilizing qualified Assembly subcontractor ASE Korea for 4x4, 5x5, 6x6, 7x7 and 9x9mm LFCSP products.
2. ADI has qualified ASE's standard bill of materials in a SAWN singulated leadframe.
3. There will be a change in BOM for some of the products. See attached for changes and package outline differences.
4. Qualification on 8x8mm LFCSP to be performed. See attached Qualification Plan.

Reason For Change:

STATS ChipPAC Singapore is obsoleting the package.

Sawn LFCSP is ADI's technology direction for LFCSP. The use of ADI qualified ASE-Korea as an assembly site will ensure continued source of product supply. ADI's assembly subcontractors manufacture our products using Analog Devices specified manufacturing flows, process controls and monitors. This assures that our customers receive the same level of quality and reliability on products they receive from qualified ADI manufacturing locations.

Impact of the change (positive or negative) on fit, form, function & reliability:

The devices' function and reliability as specified by the product data sheet will be unaffected by these changes. The Lead Foot Print Dimension will remain the same for both punch and sawn LFCSP products.

Product Identification *(this section will describe how to identify the changed material)*

Assembled parts will be identified by assembly lot number.

Summary of Supporting Information:

Qualification has been performed per Industry Standard Test Methods. See attached Qualification Results Summary. Qualification will be performed per Industry Standard Test Methods. See attached Qualification Plan.
