## Product/Process Change Notification

### Laser marking in Film & Paper production

<b>Date: 25-June-2021</b>	<p align="center"><b>ID Number (MMDDYY):</b> PCN-210622-KB_Laser_marking  <b>Note: This document replaces the previous one: PCN-190807-KB</b></p>
<b>Affected Products</b>	Please see below list of the series
<b>Change</b>	<p><b>KEMET plan to extend the laser marking option to all pitches of above series</b></p> <p>The both marking (inkjet and offset) and laser marking will be used in parallel. The laser marking will be flexible option.</p> <p><b>Current marking (inkjet and offset) and new laser marking process can be used for top and lateral side without any change in the information contained in the marking (see example below).</b></p> <p>Slight change in the layout can be possible but this does not affect the content of the information of the current marking.</p> <p>Laser marking has already been used for several series during latest years without any issue in terms of marking readability and reliability.</p> <p>This change will be achieved without impact to product form, fit or function, as the products are equivalent with respect to physical, mechanical, quality and reliability characteristics.</p>
<b>Justification and Benefits</b>	<p>Increase of the production flexibility.</p> <p>Focus on the best practices in upgrading the marking tools and in using the latest state of the technology</p>
<b>Effective Date and Identification</b>	<p>Starting date for order confirmation:      July 20<sup>th</sup> 2021</p> <p>Intended date for initial deliveries      July 20<sup>th</sup> 2021</p> <p>Without acknowledgement of this notification by July 19th, 2021 KEMET will proceed to implement the change as described herein.</p> <p>No specific identification will be stated on the label because no changes will be operated on the product with the exception of marking art.</p>
